                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Sequence 11, Application US/09910059

Patent No. US20020142359A1

GENERAL INFORMATION:

APPLICANT: Copley, Clive G

APPLICANT: Edge, Michael Derek

APPLICANT: Emery, Stephen Charles

TITLE OF INVENTION: Monoclonal Antibody to CEA, Conjugates Comprising Said Antibody,

TITLE OF INVENTION: Monoclonal Antibody to CEA, Conjugates Comprising Said Antibody,

TITLE OF INVENTION: Monoclonal Antibody to CEA, Conjugates Comprising Said Antibody,

TITLE OF INVENTION: Their Therapeutic use in an Adept System

FILE REFERENCE: 1991-209

CURRENT APPLICATION NUMBER: US 09/171,945

PRIOR APPLICATION NUMBER: PCT/GB97/01165

PRIOR FILING DATE: 1997-04-29

PRIOR FILING DATE: 1997-02-14

PRIOR FILING DATE: 1997-03-13

SOFTWARE: Patentin version 3.1

SEQ ID NOS: 131

SEQ ID NOS: 131

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Sequence 6, Application US/09808037

Patent No. US20020052311A1

GENERAL INFORMATION:

APPLICANT: SOLOWON, Beka

APPLICANT: HANAN, Eilat

TITLE OF INVENTION: METHODS AND COMPOSITIONS FOR THE TREATMENT AND/OR DIAGNOSIS OF

TITLE OF INVENTION: METHODS AND DISORDERS

FILE REFRENCE: SOLOMON-2D

CURRENT PELLIAG DATE: 2001-03-15

PRIOR APPLICATION NUMBER: 09/629,971

PRIOR APPLICATION NUMBER: 09/629,971

PRIOR FILING DATE: 1999-12-29

PRIOR APPLICATION NUMBER: 05 00/473,653

PRIOR FILING DATE: 1999-09-03

NUMBER OF SEQ ID NOS: 33

SOFTWARE: PATENT VESTOR NOS: 33

LENGTH: 239
